## About the OPIS Bottom Line Report:

Each day, OPIS uncovers wholesale fuel purchases transacted at values below the OPIS posted prices that appear in our Daily Wholesale Rack reports. We verify these transactions and publish these "Bottom Line" values in each market to give buyers and sellers visibility into the lowest transacted wholesale purchase prices on any given day. "Bottom Line" prices are then contrasted against the OPIS Benchmark Low posted price as a gauge to identify how much lower these "Bottom Line" prices are. "Bottom Line" prices include TVAs and other discounts and are often contract prices between suppliers and purchasers reflecting volume discounts, although specific volumes are not reported.

## OPIS Bottom Line Report Methodology:

- Net OPIS Low value is derived from OPIS Terminal Low value
- $\Delta$ OPIS Low = Delta (or differential) from OPIS Low
- "Bottom Line" values are always Net and are contrasted against the Net OPIS Contract/Closing Terminal Low poster where there is a delta from the OPIS Low ( $\Delta$ OPIS Low) posted
- All "Bottom Line" values are rounded
- The supplier of the "Bottom Line" value will not be identified
- OPIS Bottom Line data is published twice a day:
  1. At approximately 10:00 am Eastern and is based on OPIS Contract Terminal Low
  2. At approximately 6:00 pm Eastern and is based on OPIS Closing Terminal Low
- Where the " $\Delta$ OPIS Low" (Delta to the OPIS Low) is shown as 0.0000, the OPIS Low is the lowest wholesale value tracked by OPIS
- Where product and " $\Delta$ OPIS Low" = "-- --", OPIS tracks no supplier prices for that particular product/location pair
- To determine the specific product type by location, use the notes in the location column. For instance, a California CARB Gasoline "Bottom Line" Value can be found under the "RFG 10" product header with a note in the location column specifying "CARB".
- Ethanol Bottom Line values are derived from Pure Ethanol without RIN in markets where it is available. In markets where Pure Ethanol is only available with RIN, OPIS will reference Pure Ethanol w/ RIN for the Bottom Line Ethanol quote.
- When Bottom Line product is less than a 9lb RVP, OPIS indicates LRVP on the report by indicating the RVP in parenthesis () in the location column. If there is no indication of RVP, the product is 9lb or higher
- The Ethanol Tax Credit value is NOT included in OPIS Bottom Line prices
- All California Bottom Line price data is normalized to include costs associated with cap-and-trade using the OPIS CAR assessment or the supplier's own CAR/GHG cost for suppliers who do not embed the cost in the posted price.
