 OPIS FIXED FORWARD RACK PRICE REPORT - SETTLEMENT

Date: October 12, 2009

OPIS FORWARD RACK METHODOLOGY

The OPIS Fixed Forward Rack Price Report provides daily low, high, and average buy/sell transactions in the marketplace for gasoline, diesel fuel, and heating oil six months into the future.

Price discovery is for 'basis' differentials suppliers offer to customers for each of the forward months, sorted from 'low' to 'high' then averaged based upon a survey of supplier quotes.

'Implied' forward numbers are derived using a mathematical computation that combines the basis differential with a NYMEX futures 'snapshot'. The NYMEX 'snapshot' reference is a frozen timestamp indicated on the report -- a mid-day frozen NYMEX on the 1:00 p.m. EST report and the NYMEX settle snapshot on the 4:00 p.m. EST report. The result is a forward month product value expressed in US/cents per gallon.

In addition to the individual monthly snapshots for each city, OPIS provides six-month 'basis' and 'implied' averages for your convenience, reported in the 6 MONTH WINDOW.

Gasoline RVP levels are not indicated, only conventional unleaded quotes are reported. Zero unleaded, ultra low sulfur and No2 diesel quotes, represent flat or even value ranges, while dashes indicate no data available.

*Basis ranges deemed reliable at press time.

NYMEX SNAPSHOT 10/12/2009 AT CLOSE

December RBOB	181.64	December HO	191.99
