

CANADIAN REPORT:

4/02/2012 - ***OPIS MORNING PREVIEW:CRUDE SEES MODEST LOSSES; WHOLESALE GAS COULD MOVE HIGH NYMEX/GLOBEX PREVIEW . . .

Crude oil prices are modestly lower this first business session in April, and that's an unusual occurrence, since new fund money often advances the price in the early days of the quarter. There is definitely less enthusiasm for chasing crude oil higher, now that a softer demand quarter is at hand, and thanks to talk that the Saudis may even be looking at cutting official sales prices (OSPs).

WTI was hovering just above \$102.50 bbl, down some 50cts bbl or so, and CFTC data released Friday showed that some money has flowed out of length in WTI futures and options. Brent crude was down a similar amount and price quotes in the \$122.50 bbl range are still frightening for North Atlantic refiners.

There was little news in the overseas markets to guide prices. Little economic data has been released and most of the statistics point to a slight slowdown in emerging economic growth. The U.S. dollar is flat, and U.S. equities markets are expected to open with scant change. CASH MARKET OVERVIEW . . .

This is the month which quite often features the rise, and fall, of spring RBOB contracts. All of the country will see terminals converted to various summer blends by month's end. Quite a few terminals have moved to summer standards well ahead of that EPA deadline.

Northeastern prices will bear special scrutiny. Spot N.Y. RBOB that meets VOC-controlled specs begins the month around \$3.37 gal. As that number becomes a benchmark for wholesale deals in the northeast, many marketers face increases of 10-22cts gal on their fuel.

The one market that has long since completed its summer transition is the U.S. West Coast and CARBOB there varies from just \$3.18 gal in the Bay area To \$3.21 gal or so in Los Angeles. With the exception of Group 3, where only conventional gasoline changes hands, western prices represent the cheapest spot gas in the country.

RBOB futures spent most of the morning in positive territory, but they slumped within the last half hour. May contracts were off 0.34cts gal at \$3.3047 gal with similar losses in other summer months. Friday saw quite a bit of "crack selling" where traders were locking in hefty gasoline cracks versus either WTI or Brent crude.

The month starts with retail gasoline prices of \$3.925 gal nationally, compared to \$3.645 gal on this day last year. In 2011, the early April numbers was some 34cts gal below its eventual spring high. This year, much of the increase may have occurred in January, February, and March.

CANADA - Price changes for today please check below for current values.
