

OPIS provides complete pricing, news and analysis from the refinery gate to the wholesale rack.

Goals

- Buy replacement barrels during times of supply disruption at the best possible price.
- Establish transparent pricing for customers at the wholesale rack.
- Be the first to know about infrastructure upsets or changes to product specifications.

Challenges

- Meeting commitments downstream when there is a refinery glitch that impacts supply.
- Selling fuel at the wholesale rack at a competitive price.
- Getting information on supply disruptions in the market or specifications changes to the fuel slate that can impact operations and business decisions.

OPIS Solutions

OPIS Spot Tickers show you real-time valuations throughout the full trading day so replacement barrel prices can be assessed fairly.

Receive an essential third-party benchmark to ensure transparency for customers at the wholesale rack.

Give suppliers the tools they need to offer their customers deals based on spot pricing formulas through OPIS Spot Reports.

Get extensive price history to help resolve billing discrepancies.

Read breaking news on refined product developments ahead of wire services.

Clients Include

ExxonMobil	Shell
Conoco Phillips	Tesoro
Truman Arnold	TransMontaigne
BP	Chevron

“OPIS strives to understand the fundamental factors influencing price movements beyond simple reporting of numbers.”
