Oil Price Information Service (OPIS) is an independent and IOSCO certified worldwide Price Reporting Agency (PRA). OPIS Natural Gas Daily prices are based on multiple sources of trades for natural gas that is traded for "day-ahead" flow. Nominations for "day-ahead" flow must be made by the nominating party by 2:00p.m. Eastern time on the calendar day one day before the nominated gas is scheduled to start flowing. A pricing hub with matching Low, High and Average price values is a market assessment based on a number of possible inputs including direct pricing sources, a differential to another market, an editorial assessment, or a combination of these factors. OPIS Natural Gas Senior Analyst Alan Lammey, an industry veteran with over 16 years of experience monitoring and analyzing natural gas markets, may be reached directly at alammey@opisnet.com or 832-679-7278. The full methodology statement for the OPIS Natural Gas Pricing report can be found at <http://www.opisnet.com/about/pdf/OPIS-NaturalGasPricing.pdf>.
