

Transportation

OPIS provides fleets and airlines with comprehensive price data to optimize fuel buying opportunities.

Challenges

- Purchasing must-have fuel from a limited pool of suppliers
- Controlling price risk for massive fuel purchases in a volatile market
- Changing regulations and fuel mixes add to complexity in purchase process
- Managing fuel surcharge programs

Goals

- Understand national and regional market trends influencing fuel prices
- Increase fuel purchasing flexibility within infrastructure restrictions
- Leverage bulk-buying position with suppliers

OPIS Solutions

The official price benchmark for cost-plus deals in North America

Spot and wholesale pricing reports with global-to-local trend analysis in real time

News alerts identifying new buying opportunities, new market suppliers and changing fuel spec regulations

OPIS450: A live trading platform offering round-the-clock price transparency to key jet fuel trading hubs

Clients Include
