

OPIS North American Propane Ticker

React faster to propane spot price changes in key markets

The OPIS North American Propane Ticker updates spot prices throughout the trading day in all major U.S. and Canadian hubs to help you make buy/sell decisions before the market moves against you.

Market Challenge

The spot propane market can be volatile. It follows seasonal trends and is prone to daily swings caused by supply/demand disruptions. Propane values at spot hubs can “disconnect” from each another due to market fluctuations. For informed supply decisions as the market moves, there’s a need for intraday discovery of where benchmark prices are heading.

How We Help

The OPIS North American Propane Ticker provides live indications of futures prices, physical prices and swaps for Mont Belvieu TET, Non-TET, Other Non-TET, Conway In-Well, Hattiesburg In-Line, Edmonton, Alberta and Sarnia, Ontario. Detect any spike or retreat in the market at a glance from your desktop.

Benefits

- All-day price quotes enable you to plan your liftings strategically and buy product at the lowest cost
- Assess risk more accurately with the latest swap futures
- Understand what’s causing market volatility with news alerts
- Predict market trends by viewing five days of closing price history
- Get an hour-by-hour indication of where the official OPIS benchmark average price will be assessed
- Minimize screens on your desktop with intraday futures market tracking

Who We Help

- LP Gas
- Propane
- Butane
