# **OPIS Wholesale Racks**

Optimize your fuel transactions with accurate wholesale pricing delivered in real time across multiple formats.

OPIS publishes more than 35,000 prices in nearly 400 wholesale markets, all available via various channels including email, online, mobile, API and custom feed.

#### Market Challenge

To establish trust among all parties involved in fuel transactions, benchmark prices are critical. Visibility into supplier wholesale pricing ensures that the cost of fuel to end-users such as independent retailers and manufacturers accurately reflects the market. Without such transparency, fuel buyers can leave money on the table during contract negotiations. Fuel sellers also need an accurate price to reference when invoicing customers.

# How We Help

For more than 30 years, the wholesale fuel industry has relied on accurate OPIS rack price benchmarks to set contracts for the sale of billions of gallons of fuel annually. OPIS email and online reports list supplier-posted gasoline and diesel prices at hundreds of U.S. rack locations with various grades, types, blends and RVP included. Historical and ad hoc prices are also available. Delivery type, formats and frequency are flexible and customizable. OPIS also provides specialty pricing reports for increased visibility into more granular pricing options with fast turnaround to customer requests.

## Benefits

Tap into the largest available database of rack price data, verified by a quality control team with decades of industry experience

React quickly to market moves with online access to real-time pricing all trading day

Identify the suppliers operating in your market determined by stringent OPIS criteria and discover the lowest prices

See what other suppliers are charging at the rack – branded & unbranded – so you know if you're paying a fair price

Discover deals done below the official OPIS low

Learn the cost of product in new markets

Evaluate inventory and reconcile invoices using a historical database covering more than 20 years

Feed OPIS prices into back office systems for more efficient accounts payable or receivable

Request a free trial

## Terminal Display

See prices for each supplier and product, broken down by the specific terminal where price is available.

#### Standard Display

Get one price per product, per supplier in each market, with the most representative value shown.

## Spot Replacement Index

Track supply costs to get product from the refinery to the rack.

## Octane Display

Track prices/averages for all octanes available in a market, instead of just one price for Unleaded/Midgrade/Premium.

# Out-Of-Product & Average Designations

See supplier prices that have been verified to be completely out of product for 24+ hours (Out-of-Product), and prices that are excluded based on our dynamic quality control (Out-of-Average).

#### Smart Rack

See average rack-to-retail margins and determine if your margins are consistent with others in your area

## Timing of Delivery

Choose from several benchmark delivery times, including contract average (10am ET), closing average (4:59pm ET) and calendar day average (11:59pm ET). In addition to real time data via our Real-Time-Racks platform, delivery timings are also available at 6:45am ET, 9:00am ET, 11:00am ET, 2pm ET, 7:15pm, 8:15pm, 9:15pm, 10:15pm ET.
