

## Refinery Focus Daily

**Gain insight into how petrochemicals affect the U.S. gasoline, blendstock and feedstock markets**

Refinery Focus Daily summarizes price movements in the downstream commodity markets related to refineries.

### WHO WE HELP

**Petrochemical Companies**

**Refiners & Suppliers**

**Financial Institutions**

### COMMODITIES

**Gasoline**

**Benzene**

**Propylene**

**Aromatics**

**Alkylate**

**Reformate**

**Raffinate**

**VGO**

**Toluene**

**Xylene**

### MARKET SEGMENT

**Spot**

### Market Challenge

Petrochemical producers and consumers need to know how petroleum refinery economics and production trends affect chemical prices. However, finding refinery news focused on petrochemicals isn't always easy. Changes in gasoline requirements or trends can affect propylene and chemical aromatics markets in ways that are not always obvious. The diverse downstream markets for propylene and benzene present another layer of complexity on a domestic and international scale.

### How We Help

In a concise 5-page format, Refinery Focus Daily shows how petrochemicals and refining economics intersect. The report delivers an independent summary of each day's closing prices and trading activity in all petrochemical markets related to propylene and benzene.

### Features

- Daily RGP and PGP trading activity, RGP's alkylate value, PGP's spread to propane
- Benzene, toluene, mixed xylenes, trading activity, fuel values for each and downstream styrene and cumene pricing
- Month-to-date weighted and calendar averages for RGP, PGP and benzene
- Same-day news about steam crackers, refineries, splitters, PDH units and associated downstream plants
- General trends in refined products markets, such as seasonal gasoline RVP changes, import and export trends in naphtha and VGO, crack spreads and FCC margins
