

OPIS Refined Spot Biofuels Deal Log

Track daily transactions of RINs and other credits to remain in compliance with RFS, LCFS and CFP

OPIS Biofuels Deal Log is a single source for daily activity in multiple markets

Market Challenge

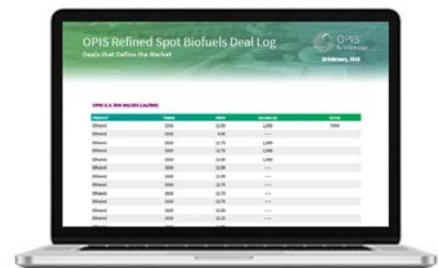

Stakeholders who must comply with the federal Renewable Fuel Standard (RFS), California's Low Carbon Fuel Standard (LCFS) and Oregon's Clean Fuel Program (CFP) need to submit sufficient carbon credits to prove compliance or face negative consequences, including steep fines. However, finding credits to satisfy these regulations is difficult because the markets in which they trade are often volatile and opaque.

How We Help

OPIS Biofuels Deal Log makes it easy to track daily activity from dozens of market sources, all in one report. You get a comprehensive overview of RINs, LCFS and CFP credit transactions in an easy-to-read format, delivered by email as a PDF. Gain greater understanding of the cost of compliance in each of these federal and state programs.

Benefits

- Track where RINs traded for each RIN category, including current- and vintage-year
- Learn traded price levels, credit type, volumes and more
- Discover opportunities in the spreads along compliance curves
- Understand how OPIS utilizes reported deals in price discovery
- Monitor pricing and volatility trends in California and Oregon credit trading
