

In the new IMO 2020 world, daily assessments of marine fuel prices are must-haves for profitable purchases.

Complying with IMO 2020 regulations to use 0.5% very low sulfur fuel will be expensive. So ship owners and other market players need to know true transactional value of bulk and bunker fuels at the port to avoid wasting tens of thousands of budget dollars on annual purchases. Here's how it can play out:

To negotiate cost-effective marine fuel contracts — including calculated prices for the new 0.5% VLFSO — you need daily price benchmarks.

OPIS Global Marine Fuels provides a daily calculated price for the new 0.5% VLSFO along with key marine fuel prices in the most important ports of Asia, Europe and the Americas. Charts, graphs and tables reveal price trends at a glance worldwide. Full-day assessments give you maximum transparency and reliability.
