

Managing carbon emissions compliance can be costly without a clear view of the trading market

The secondary market for carbon offsets consists of many trades, bids and offers that fluctuate across a wide range. To realize profit amid such volatility, buyers and sellers need a single assessment of fair market value. For example, in a typical trading day:

OPIS Carbon Market Report provides clarity in the decentralized and opaque carbon marketplace.

In a single report, OPIS collects carbon pricing information from multiple IOSCO approved sources for CCA, CCO-3, CCO-8, Golden CCO, Zero CCO, LCFS, RINs and RGGI to produce streamlined daily assessments that define fair value based on actual market activity.

Request a FREE 10-day trial and reduce your cost of compliance.
