

## WHO WE HELP

- Transportation
- Refiners & Suppliers
- Traders

## COMMODITIES

- Crude Oil
- Diesel
- Jet Fuel
- Coal

## MARKET SEGMENT

- Spot

Monitor daily bulk and bunker fuel prices in a market operating under IMO 2020 emission regulations.

The OPIS Global Marine Fuels Report delivers daily price assessments for 0.5% VLSFO and high-sulfur bulk and bunker fuels in the most important ports around the world

### Market Challenge

Beginning in 2020, the International Maritime Organization (IMO) required ships to begin using 0.5% very low sulfur fuel oil (VLSFO) to reduce emissions. Complying with this regulation will be expensive, so ship owners, refiners, suppliers and other market players need reliable pricing on affected fuel types to evaluate compliance options and make cost-effective operating decisions.

### How We Help

The OPIS Global Marine Fuels Report provides daily full-day price assessments for 0.5% VLSFO along with key marine fuels in the most important ports of Asia, Europe and the Americas. This quick-read report identifies the ports selling the most volume so you can focus on

market movers. Charts, graphs and tables reveal price trends at a glance worldwide.

### Benefits

- BTU Indicator helps you plan cost-effective fuel purchases by calculating the energy content in the 0.5% sulfur spec compared to legacy bunker fuels
- Full-day pricing assessments provide true transactional value while news and commentary provide market context
- Concise and priced to fit any budget and robust enough to stand alone as your pricing benchmark
- Email and phone access to editorial experts ready to answer your questions
