OPIS Invoice Checker

A low-cost alternative to verify fuel purchase prices at your convenience and easily reconcile invoices

The OPIS Invoice Checker is a low-cost online tool to keep suppliers honest and ensure you pay the correct price for fuel. Spot check invoices without the commitment of a year long subscription and only pay when you run a query.

Market Challenge

Fuel buyers need to verify prices, but checking daily rack prices can disrupt the workflow and is often outside the budget of small businesses who instead place full trust in suppliers. With many new index-based fuel contracts using a spot price instead of a rack price, additional price verification is needed. And while pricing data is available from many sources, most require expensive subscriptions that supply more information than buyers really need.

How We Help

The OPIS Invoice Checker is an online, on-demand, low-cost way to audit fuel purchases one price at a time. Pull rack or refined spot prices whenever you need them and pay only for the data you need without being locked in to a long-term subscription.

Benefits

- ✓ Pull a single price for as low as \$15/query
- ✓ Pinpoint the price you need quickly, in just a few clicks
- ✓ Select the exact parameters of your price, including date, location, product, grade, benchmark and supplier
- ✓ Save time and money while boosting confidence in your fuel purchases
